## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-4, 7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6: the recitation, "in a direction toward the center of the vertebral column" renders the claim vague and indefinite since it is unclear what structure is being claimed by the Applicants.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al. (US 5,368,594).

Martin et al. disclose a vertebral osteosynthesis device or rachidian anchoring device including: pedicular hooks 5a; a transverse rod 3 having a smooth cylindrical profile and capable of being cut; each hook 5a including an anchoring portion; a clip 12 to secure rod 3 in the open body of each hook 5a; each hook 5a having a prolongation 16 directed perpendicular to the direction of securement of rod 3 with the hook wherein

the prolongation has a tapped bore 15 coacting with a pressure screw 14 (Figs. 2-3, col. 3, lines 15-68 and col. 4, lines 1-39).

### ***Response to Arguments***

Applicant's arguments submitted under "REMARKS" in the response filed on October 15, 2007 have been fully considered but are not persuasive for the following reasons.

Contrary to Applicants' arguments, the Martin et al. osteosynthesis device permits compression between two pedicular hooks in a direction toward the center of the vertebral column.

It is also noted that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
